LSU Solicitation RFQ-0000000086
Open Jet/Wind Tunnel Equipment
Addendum 1

Vendor Q1: Do all of the drives need to be in a single enclosure or do they want separate enclosures for each drive?

LSU R1: Single enclosure.

Vendor Q2: Do they really need the 12-pulse design VFD? The reason I ask is the spec. is not very clear. It first mentions a line reactor, then it mentions a 12-pulse design, and it talks about the transformer being external and I haven't seen a multi-pulse design with the transformer external to the enclosure before.

LSU R2: The harmonics may be reduced by a 12-pulse design VFD or a line reactor. Just a way to reduce harmonics.

Vendor Q3: Do we have a contact for who wrote the spec. to talk about the U1000?

LSU R3: No, any questions pertaining to the specifications must be submitted in writing to the campus buyer, Holly Leonards at hollyl@lsu.edu.
